A broad collection of free content items, customizable templates, and popular apps.

Integration with a range of media players including Raspberry Pi, BrightSign, Amazon Signage Stick, Android and more.

Explore Yodeck's top features

Designed to simplify and enhance your digital signage experience

Yodeck API

Automate your digital signage with the Yodeck API, enabling **seamless scheduling, deployment, and remote control** of your screens.

Intelligent interactivity

Create engaging, interactive experiences by making it easy for users to **explore content, find information** when they need it, or **enjoy personalized playlists**.

Branded templates

Create **custom layouts** based on your brand guidelines, ensuring **consistency across screens**. Lock specific areas and share templates within your organization.

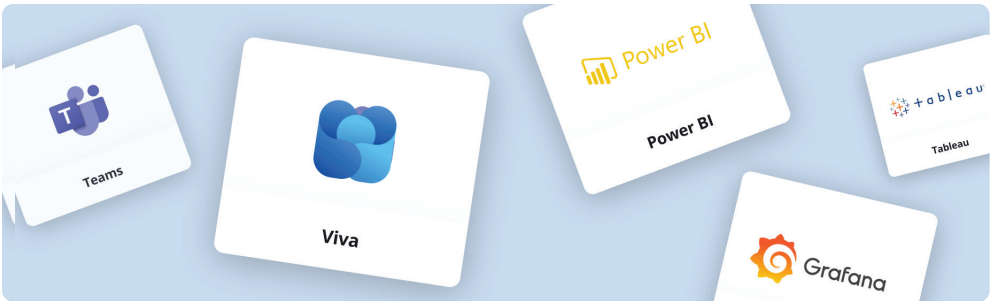

Screen takeover

Override your screen's default or scheduled content. This feature is perfect for announcements, events, flash sales, or last-minute changes. Easily **manage one or multiple screens at once**.

Yodeck apps: A world of options

Make your digital signage smarter and simpler

Yodeck offers **over 80 powerful apps** designed to enhance your digital signage experience. From Microsoft apps like **Teams** and **Viva Engage** to popular dashboard integrations such as **Power BI**, **Grafana**, and **Tableau**, we've got you covered.

Additionally, with **creative tools** like **Canva** and many others, you can easily **create, manage, and display** dynamic content tailored to your needs. Our wide range of apps ensures you and your customers have the flexibility and resources to elevate your signage to the next level.

Discover the power of Yodeck with industry-leading media players
