Countries

Key Features

Stellar capabilities & security for world-class digital signage.

Instantly Show Any Content on Screen

Display images, videos and playlists on screen with a simple drag & drop. You can also easily show documents, web pages, YouTube videos, livestream videos and much more.

Easy Scheduling & Screen Management

Set different content schedules to target the right viewers, at the right time. Manage thousands of screens and upload, edit & display content remotely from your PC, using our online platform.

Free Apps & Templates

Thousands of free professionally designed layout templates and stock media for every industry, easily customizable and personalized to your business.

Extreme Security & Reliability

Enterprise-grade security includes SSL, firewall & password policies, player lock-down & storage encryption features. Align your digital signage with your security policy.

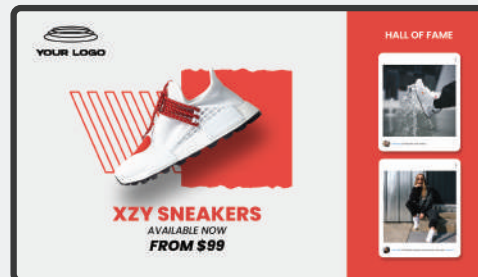

Ideal for All Industries

Make your screens unforgettable to the people that matter most. Indicative use cases:

Restaurants, Cafés and Bars

Retail

Education

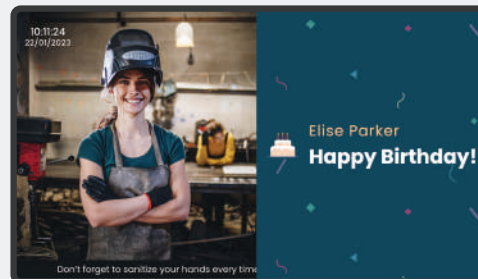

Healthcare

Office

Manufacturing

Supported Media Players

Use Yodeck's proven and powerful media player based on Raspberry Pi, or pair our software with a range of other popular hardware which we are constantly expanding.
